

LAMBSON LIMITED

SAFETY, HEALTH AND ENVIRONMENT POLICY

LAMBSON LIMITED shall conduct its business and development operations in such a manner, that it shall protect the Safety, Health and Welfare of its employees, contractors, suppliers, customers, the public and the environment.

The Company will seek constantly to improve its health and safety performance and to prevent any adverse environmental impact of its activities. The Company will also seek to share its experiences with its industrial colleagues.

Legal requirements and regulations will be considered as minimum standards. The Company will seek to co-operate with regulatory bodies and other agencies to meet its statutory obligations for its previous, current and future activities.

The Company will assess the risks associated with its activities, products and services so as to maintain documented systems, which ensure proper management of those risks.

The Company will report on its Safety, Health and Environmental performance on a regular basis.

The Company will adopt communications and training programmes where applicable in order for employees and contractors to actively participate in the Company's responsible care commitments
